

JUNI 2009

We are pleased to announce that CA Spectrum Infrastructure Manager (CA Spectrum) r9.1.0 is now available.

CA Spectrum software delivers integrated network services, fault and configuration management across diverse, multi-technology networks to assure the availability of critical network services that are essential for your business applications. Patented root-cause and impact analysis technology immediately pinpoints the degraded or failed network component, indicates who and what devices and which services are impacted, and offers a fix. Integrated configuration management eases the complexity of managing change to network device configurations. Reporting capabilities deliver at-a-glance, actionable information regarding IT asset, availability, and event/alarm and performance metrics.

Key features for CA Spectrum r9.1.0 include:

New Core Functionality

- Virtual Host Manager for managing virtual environments
- MPLS Transport Manager for managing MPLS Traffic Engineered environments (optional add-on)

Integrations

- New CA IT Process Automation Manager (CA IT PAM) Gateway for CA Spectrum – BMC Remedy Service Desk Integration (optional add-on)
- New CA eHealth Traffic Accountant for Traffic utilization insight
- Enhanced CA Service Desk for automated service desk Integration
- Enhanced CA Wily Introscope for Application Performance Management

Core Platform Enhancements

- Cisco NX-OS Certification for the Nexus 5000 and 7000 Switches
- Alcatel Discovery Protocol Support
- New Integration package Utility for deploying Spectrum Integration toolkits and utilities on 3rd party hosts
- Multilink Physical Connection Monitoring
